

TUBIGAN, DYNAR B.

• Fairview, Quezon City • dynartubigan.1@gmail.com • 09453900643

IT student seeking a Quality Assurance internship with foundational knowledge in web development and basic IT support concepts to support effective testing and system validation. I am willing to learn, continuously improve my skills, and explore cybersecurity concepts as part of my professional growth while building strong IT fundamentals.

Education

Polytechnic University of the Philippines

Bachelor of Science in Information Technology

Thesis: IThics: A Framework for Promoting Ethical Awareness in Data Brokerage and Privacy

Capstone Project: Online Ordering System (OOS)

Honors: President's List (A.Y. 2022-2023, 2023-2024); Dean's List (A.Y. 2023-2024)

Quezon City Campus

2022 - Present

Experience

Capstone

Project/Backend

Developer

PUP Quezon City Campus

2024 - 2026

- Supported core system functionality through backend logic implementation and validation
- Assisted in testing user authentication, order processing, and data handling workflows
- Documented system issues, edge cases, and improvement recommendations during development
- Collaborated with team members to ensure system stability, data integrity, and usability
- Helped verify system readiness through functional checks and test execution

Undergraduate Researcher (Data Privacy & Digital Risk Awareness)

PUP Quezon City Campus

2024 - 2026

- Analyzed user behavior and internet usage patterns to identify digital risks, security gaps, and privacy concerns
- Designed and administered structured surveys for 300+ users, ensuring data accuracy, confidentiality, and ethical handling
- Assessed security awareness, phishing risks, and alignment with the Data Privacy Act of 2012
- Documented findings and recommendations to support user education, policy improvement, and risk mitigation initiatives

Skills & Interests

Technical:

- Basic computer troubleshooting (hardware & software)
- Incident documentation and reporting
- Manual software testing fundamentals (test cases, UAT)
- Data privacy and security awareness

Soft Skills:

- Clear written and verbal communication
- Team collaboration
- Willingness to learn

Interests:

- Learning about data privacy and cybersecurity fundamentals
- Exploring software testing practices
- Improving technical communication and documentation
